ABOUT BITTER GOURD

Soil

Well-draining, fertile soil rich in organic content.

Container or Garden bed

Garden bed and container. Both are recommended.

Fertilizer

Urea, Balanced NPK fertilizer at planting and maturity days

Water

Regular, moderate (increase in summer, decrease in winter)

Light

Full day sunlight.

Temperature

25-30°C (77-86°F)

Seed Rate

2-3 seeds per sq. ft
2kg per acre

Mulching

Beneficial in cold weather to protect plants from frost, but avoid in summer as it may retain too much moisture.

Maintenance & Care

Moderate-high care. Plant matures at 50-60 days after sowing

Support Structure

Trellis or support

Tools

Spade, trowel, scissors

For Your Knowledge

These tips are general & may vary based on your specific location & weather. Seed Fertilizer is not responsible for any potential losses.
