ABOUT FENUGREEK

Soil

Well-draining, fertile soil rich in organic content.

Container or Garden bed

Garden bed and container. Both are recommended.

Fertilizer

Balanced NPK fertilizer at planting and maturity days

Water

Regular, moderate (increase in summer, decrease in winter)

Light

Full day sunlight to partially sunlight.

Temperature

20-30°C (68-86°F)

Seed Rate

1 gm per sq. ft
50kg per acre

Mulching

Beneficial in cold weather to protect plants from frost, but avoid in summer as it may retain too much moisture.

Maintenance & Care

Moderate-high care. Plant matures at 35-40 days after sowing

Support Structure

No support needed

Tools

Spade, trowel, scissors

For Your Knowledge

These tips are general & may vary based on your specific location & weather. Seed Fertilizer is not responsible for any potential losses.
