# ABOUT GREEN CHILI

## Soil

Well-draining, fertile soil rich in organic content.

## Container or Garden bed

Garden bed and container. Both are recommended.

## Fertilizer

Balanced NPK fertilizer at planting and maturity days

## Water

Regular, moderate (increase in summer, decrease in winter)

## Light

Full day sunlight.

## Temperature

20-35°C (68-95°F)

## Seed Rate

3-4 seeds per sq. ft  
150gm per acre

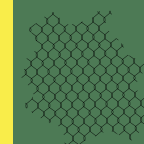

## Mulching

Beneficial in cold weather to protect plants from frost, but avoid in summer as it may retain too much moisture.

## Maintenance & Care

Moderate-high care. Plant matures at 60-75 days after sowing

## Support Structure

No support needed

## Tools

Spade, trowel, scissors

## For Your Knowledge

These tips are general & may vary based on your specific location & weather. Seed Fertilizer is not responsible for any potential losses.
