ABOUT SPINACH SEED

Soil

Well-draining, fertile soil

Container or Garden bed

Garden bed and container. Both are recommended

Fertilizer

Urea, Balanced NPK fertilizer at planting and maturity days

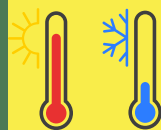

Water

Regular, moderate (increase in summer, decrease in winter)

Light

Full day sunlight to partially sunlight.

Temperature

15-35°C (59-95°F)

Seed Rate

0.4gm per sq. ft
20kg per acre

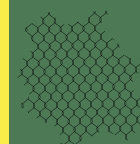

Mulching

Beneficial in cold weather to protect plants from frost, but avoid in summer as it may retain too much moisture.

Maintenance & Care

Moderate-high care. Plant matures at 30-35 days after sowing

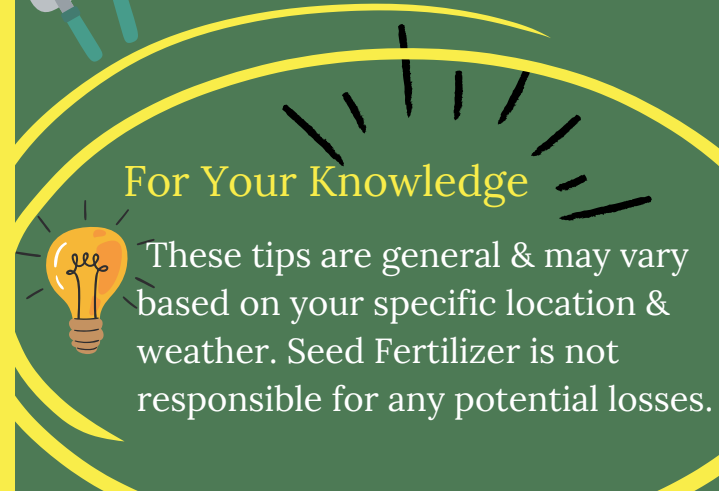

Support Structure

No needed

Tools

Spade, trowel, scissors

For Your Knowledge

These tips are general & may vary based on your specific location & weather. Seed Fertilizer is not responsible for any potential losses.
